Archaeological Reports

ARCHAEOLOGICAL MONITORING REPORT FOR THE REMOVAL OF SHORELINE IMPROVEMENTS AT THE QUEEN LILI'UOKALANI TRUST CAMPGROUNDS IN KEAHUOLŪ, NORTH KONA DISTRICT, ISLAND OF HAWAII [TMK: (3) 7-4-008:002]. Prepared by Tanya M. Lizama, M.A., Ruth-Rebeccalynne Aloua, Rowland B. Reeve, M.A. and Paul L. Cleghorn, Ph.D. Prepared for Queen Lili'uokalani Trust, 1100 Alakea Street, Suite 1100, Honolulu, HI 96813.

Academic Reports

Investigating the Potential for Arboriculture in Wai'āpuka, North and South Kohala, Island of Hawaii – Arboriculture, the cultivation of trees, shrubs, and vines, is a topic that receives varied levels of attention in archaeology. Specifically, in the districts of North and South Kohala, the potential for arboriculture and its relationship to the wet- and dry-land field systems has not been investigated. Through archaeological investigations and a review of relevant documents, I investigated the potential for arboriculture practices in Wai'āpuka. Prepared for the Hawai'i Archaeological Research Project (HARP) 2013 Field School, June 2013.

Local Fishers of Hawai'i - The regulation, or lack of regulation, of fisheries in Hawai'i is a topic of growing concern. As fish stocks decline and sustainability issues arise, fisheries management planners are attempting to reconstruct fishing regulations. Through ethno- graphic fieldwork with nine fishers I investigate the relationship between fisheries managerial categories and the practices of local fishers. August 2010 – May 2011. Honors thesis prepared for University of Hawai'i at Hilo.

EDXRF of Honokōhau Lithics - Lithic material gathered from the Honokōhau land parcel, Kailua-Kona, Hawai'i (TMK (3) 7-4- 008:42) were scanned using an energy dispersive X-ray fluorescence (EDXRF) spectrometer. A baseline was established for the geochemical makeup of Honokōhau lithics. Scanned artifacts were compared to baseline data of previously known quarry sources created by Mills and Lundblad to establish lithic sourcing. August 2010 – December 2010. School research paper.

Thesis Title: *Reauthorizing Kānaka 'Ōiwi Heritage Discourse*. This case study examines how the management practices of the National Park Service at Kaloko-Honokōhau National Historical Park affects Hawaiian lands and communities that the park was created to serve. I use documentary data and information from interviews to understand management policy and practice, and how the gap between the two limits the Park Service's ability to interpret, preserve, and perpetuate the Hawaiian culture. I describe benefits associated with Hawaiian land management and ways that NPS management policy and practice is limiting those benefits. My conclusions recommend re-aligning NPS management practices with the Congressional intent.
